DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 02/25/2004 with respect to claims 1, 2,16, 22, 23, 41 have been fully considered and were found to be persuasive for claims 2, 16, 22, 23, claims 1 and 41 are not persuasive.

Regarding claims 1 and 41, applicant argued that Matsko does not disclose an error detection program within the microcomputer, wherein the error detection program rejects current ratings sent to the electronic trip unit that are greater than the frame rating of the circuit breaker. The argument is not convincing because Matsko discloses an error detection program within the microcomputer (the error detection program shown in fig 19), wherein the error detection program rejects current ratings sent to the electronic trip unit that are greater than the frame rating of the circuit breaker (e.g. col. 32 and 33, lines 15-5). Thus, applicant's arguments of claims 1 and 41 do not distinguish over Matsko reference.

2. Claims 6-15 and 27-36 are withdrawn, and claims 17, 18, and 40 are cancelled.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 09/660,876

Art Unit: 2836

3. Claims 1, 5 and 41 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsko et al (USPN 4,809,125).

Regarding claims 1 and 41, Matsko discloses that a circuit breaker (circuit breaker 10 shown in fig. 2, 3) for an electrical circuit comprises an operating mechanism (e.g. 90, 92, 93a circuits) for interrupting current in the electrical circuit when operated; an electronic strip unit (63) including a microcomputer (100) which monitors the current in the electrical circuit and generates a trip signal by automatically operating the operating mechanism to interrupt the current when the current exceeds a selected value (see col. 11, lines 3-25); and a rating plug (84) having means establishing the selectable value of the current at which the electronic trip unit trips the operating mechanism (e.g. col. 18, lines 10-16 and col. 10, lines 14-18 and), and a non-volatile memory (embedded in the circuit 100, e.g. col. 11, lines 37-38) for storing frame current and rating current of circuit breaker (e.g. see fig. 16, steps H102, col. 18, lines 30-34), an error detection program within the microcomputer (fig. 19). Wherein the error detection program rejects current ratings sent to the electronic trip unit that are greater than the frame rating of the circuit breaker (e.g. col. 32 and 33, lines 15-5).

Regarding claim 5, Matsko discloses a display (120, fig. 5) for displaying the current rating.

Allowable Subject Matter

4. Claims 2-4, 16, 19-26, 37-39 are allowed.

Conclusion

Application/Control Number: 09/660,876

Art Unit: 2836

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Danny Nguyen whose telephone number is (571)-272-2054. The examiner can normally be reached on Mon to Fri 8:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Sircus can be reached on (571)-272-2058. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 2836

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
